Subject: Monoprost Canadian Backorder

Attention,

We want to inform you that Théa Pharma Canada will be experiencing a short-term backorder of ^{Pr}Monoprost® due to a supply disruption that is affecting multiple countries globally. We anticipate being out of stock by the end of May or early June and expect to be back in stock by late August or early September. There is a possibility we will receive a shipment earlier, and we will keep you informed should that occur. During this time, Canadian supply of ^{Pr}Monoprost® will be limited to existing inventory only.

Théa Pharma Canada has already taken the following steps:

- Listed ^{Pr}Monoprost® on the Canadian Drug Shortage reporting website
- Informed the major Ophthalmology and Optometry Associations
- Informed the relevant Patient Advocacy Groups
- Informed individual Eye Care providers through our Théa Pharma Canada field team

We understand this is a difficult situation for all ^{Pr}Monoprost® patients and prescribers and assure you that the Théa Pharma team in Canada and Globally are working to resolve it as quickly as possible. We will update this website as the situation evolves.

let's open our eyes
